KEBODI EMMANUEL FRIDAY

Data Analyst | Business Intelligence & Reporting

Lagos, Nigeria · +234 812 227 2919 · emmygreat7@gmail.com
Portfolio: emmyk77.github.io · GitHub: github.com/emmyk77 · LinkedIn: linkedin.com/in/emmyk7

PROFESSIONAL SUMMARY

Data analyst with a background in economics and engineering. I use Excel, SQL and Power BI to investigate customer behaviour and marketing performance, and EViews and SPSS to analyse economic and survey data. My research experience includes comparing technology academies and assessing their courses against selection criteria.

TECHNICAL SKILLS

Analytics & reporting: Microsoft Excel (PivotTables, slicers, formulas), SQL (joins, filtering, aggregation), Power BI (dashboards and KPI reporting), data cleaning and validation.

Statistics & research: EViews, SPSS, regression analysis, hypothesis testing, econometrics and comparative research.

PROFESSIONAL EXPERIENCE

Freelance Data Analyst | Independent — Lagos, Nigeria · 2024–present

- Clean and validate client datasets in Excel and SQL, then build Power BI dashboards to track business performance.
- Analyse economic and survey data in EViews and SPSS and explain the findings in reports for clients.

Data Analytics Intern | AFRIMENT — Career Enhancement Internship · October 2026

- Conducted comparative research on technology academies and their course catalogues as part of a team project covering more than 85 academies across Africa.
- Checked programme details against institutional sources and assessed whether academies and their course offerings met the project’s selection requirements.
- Organised verified course information into a consistent catalogue so the team could compare providers during selection.

SELECTED ANALYTICS PROJECTS

GetShopToday Marketing Analytics | Microsoft Excel, PivotTables and slicers
Built a dashboard comparing campaign spend, customers and revenue. Influencer campaigns led with 60 paid customers, while pay-per-click campaigns recorded the highest revenue at about $12,000.

E-commerce Cart Abandonment | Microsoft Excel
Analysed 10,000 cart events. Items priced above $300 accounted for 64.48% of abandoned item value, prompting a recommendation to test a targeted recovery offer.

Shop Clicker Customer Retention | MySQL
Designed five related tables and wrote five queries to identify infrequent purchases, engagement gaps and low satisfaction ratings in a fictional store dataset.

Wealthsimple Marketing Analytics | Power BI
Built a seven-page report using fictional campaign data to compare marketing spend, customer acquisition costs and conversion from signup to payment.

EDUCATION

University of Lagos | MIT (in progress) · B.Sc. Economics
Yaba College of Technology | National Diploma in Metallurgical Engineering
